Bharuch, Gujarat

ABOUT US

Based Out Of Dahej, Gayatri Engineers Has Become Synonymous Name To

- Industrial Painting
- Sandblasting
- Coating
- Engineering Services

Across Diverse Projects & Industries.

Utilizing Advanced Techniques And Quality Materials, We Employ Effective Methods And Ethical Practices To Deliver High-Quality Services, Including

- Shot Blasting
- Coating
- Epoxy Painting.

With A Track Record Of Consistently Delivering Projects Ahead Of Deadlines, We Have Become The Primary Engineering Vendors For Companies Like -

SAND BLASTING

Sandblasting, Is Used For Finishing Metal Fabrication Projects. Very Small Pieces Or Particles Are Propelled At A High Rate Of Speed To Clean The Surface And Prepare It For Painting Or Other Metal Finishing Techniques Depending On The End Use Of The Product.

We Do Various Types Of Sand Blasting Material Including -

- Silicon Dioxide Shot
- Soda Shot
- Steel Shot
- Bristle Shot
- Glass Beads Shot
- And Much More ...

SS BLASTING

Stainless Steel Blasting Are Quick, Cost-Effective Ways To Clean Steel Pipes And Tubing, And Prepare Them For Further Processing. They Can Remove Rust, Oxidative Residue, And Surface Dirt, And Can Also Roughen Or Matte The Surface Of The Steel. SS Blasting Can Also Improve The Quality Of Corrosion Coatings, And Prolong The Life Of The Steel Pipe.

- We Specialize In SS Blasting For Industrial Piping

SHOT BLASTING

Shot Blasting Uses High-Velocity Pellets Or Beads — Made Of Steel, Copper, Aluminum Or Another Substance — As Its Abrasive Material. Shot Blasting Machines Concentrate These Beads In One Area At Extremely High Speeds To Clear Materials Such As Rust, Paints Or Other Coatings

We Do Various Types Of Shot Blasting Material Including -

- Steel Shots
- Aluminum Shot
- Zinc Shot
- Garnet Steel Shot
- Lead Shot
- Steel Grit
- Stainless Steel Cut Wire Shot

AIRLESS SPRAY PAINTING

Airless Spray Is A Painting Technique Which Simplifies The Process Of Painting. This Is Achieved By Using An Airless Sprayer That Pumps The Paint Under Very High Pressure, Around 3000 Psi, Via A Specialized Hose Into A Small Hole In The Nozzle Of The Sprayer.

Airless Spraying Is Often Preferred Because The End Result Is A Smooth And Even Finish, Which Can Withstand Wear And Tear As Well As Harmful Corrosion Effects.

We Do Various Types Of Airless Spray Painting Including -

- Flat Fan Paints
- Solid Stream Paints
- Full Cone
- Hollow Cone Paints
- Mist/Fog Paints

GUNITING

Guniting Is One Of The Commonly Used Techniques In The Construction Industry To Apply Mortar Or Concrete To A Surface. It Is Called Guniting As The Process Involves Using A Spray Gun. In This Method, The Spray Gun Uses A Nozzle To Spread The Dry Mortar From The Machine To The Surface Under Compressed Pressure.

We Do Various Types Of Pipe Coating Including -

■ Dry Guniting

■ Wet Guniting

EPOXY BRUSH PAINTING

Foam Roller Brushes Work Best At Applying Epoxy Painting. This Is Due To The Uneven Application That Can Sometimes Occur With Bristle Brushes. Many Times, The Bristles Can Be Weighed Down With Product, Leaving An Uneven Coat – Requiring More Sanding Times In Between Applications. Acrylic Paint Is One Of The Most Common Colorants Used To Tint Epoxy Resin.

We Do Various Types Of Epoxy Brush Painting Including -

- Pure Epoxy
- Polyester Resins
- Epoxy Acrylates

PIPE COATING

Pipeline Coating Is A Practical And Cost-Effective Solution Designed To Preserve The Integrity Of Pipelines By Offering A Consistent Protective Lining Against Corrosion. Widely Recognized As A Reliable Corrosion Prevention Method Globally, Pipeline Coating Is Essential For Safeguarding Pipelines From Potential Damage. Despite Its Effectiveness, Pipeline Coating Involves A Complex Process With Multiple Steps, Making It A Challenging Task. Before Delving Into The Process, Let's Explore The Various Applications Of Pipe Coating.

We Do Various Types Of Pipe Coating Including -

- High Performance Powder Coating
 - Galvanizing Coating
 - Polyethylene Coating
 - Fusion-Bonded Epoxy Powder Coating
- And Much More ...

PIPING JOB

Piping Is A System Of Pipes Used To Convey Fluids (Liquids And Gases) From One Location To Another. The Engineering Discipline Of Piping Design Studies The Efficient Transport Of Fluid. Large-Scale Piping System In An HVAC Mechanical Room. Piping Engineers Design Piping Systems That Transport Water, Steam, Gas, Oil, Two-Phase Mixtures, Waste, And Other Liquids.

We Do Various Types Of Piping Material Including -

- | | |
|--|--|
| ■ Copper Pipe | ■ Galvanized Steel Pipe |
| ■ Polyvinyl Chloride (PVC) Pipe | ■ Acrylonitrile Butadiene Styrene (ABS) Pipe |
| ■ Cross-Linked Polyethylene (PEX) Pipe | ■ Chlorinated Polyvinyl Chloride (CPVC) Pipe |

FABRICATION & ERECTION

Fabrication And Erection Is The Process Of Assembling Steel Components Into A Frame On Site. Fabrication Involves Grinding, Welding, Cutting, Bending, Drilling, Punching, Burning Or Melting And Other General Crafting Methods. The Entire Steel Fabrication Process Is Systematic And Requires Utmost Planning And Precision.

We Do Various Types Of Fabrication Including -

- | | | |
|-----------|-------------|------------|
| ■ Cutting | ■ Forging | ■ Punching |
| ■ Folding | ■ Machining | ■ Stamping |
| ■ Casting | ■ Shearing | ■ Welding |

MANPOWER SUPPLY

We Provide Manpower Supply Services, Offering A Comprehensive Solution To Meet Staffing Needs Across Various Industries. Our Manpower Supply Services Involve Sourcing, Recruiting, And Deploying Skilled And Qualified Personnel To Fulfill Specific Roles Within Client Organizations. Whether It's For Short-Term Projects Or Long-Term Assignments, We Tailor Our Manpower Solutions To Match The Unique Requirements Of Our Clients

We Do Various Types Of Manpower Supply Including -

- | | |
|-----------------------|------------------------|
| ■ Staff Outsourcing | ■ Motor Mechanic |
| ■ Housekeeping | ■ Recruitment Service |
| ■ Labour Contractors | ■ Contractual Services |
| ■ Construction Worker | ■ Staffing Service |
